SUMMARY

Data Analyst and BI Developer with **3+ years** of analytics and BI experience across EY and the UH Law Center, building the Power BI financial reporting platform the Dean uses to track **\$34M+ in annual funding**. Microsoft PL-300 certified, with strong SQL, DAX, data modeling, and reconciliation skills, plus predictive modeling in Python. M.S. candidate in Engineering Data Science at the University of Houston (expected December 2026).

EXPERIENCE

Graduate Assistant, BI Developer - University of Houston Law Center

Dec 2025 - Present

- Built and maintain the Power BI financial reporting platform used by the Dean and finance leadership, modeling 11 source tables (budget, general ledger, payroll, chartfields) with DAX and Power Query to report **\$34.3M in FY2026 funding across 35 departments**, reconciled to the dollar against the official budget book.
- Extended the platform to FY2027, validating **\$30.85M in new budget allocations to the dollar** against the source workbook, and moving budget data to a single master file so future fiscal years load as an append instead of a rebuild.
- Implemented **row-level security** with Admin and department-level roles, giving each department head self-service access to only their own budget in Power BI Service.
- Built a Detailed Chartfield Report with 3-level drill-down (Chartfield, Account, Journal), and diagnosed join-key gaps across **53,000+ payroll records** to link payroll detail to general ledger transactions.

Research Intern - Humana Institute, University of Houston

Jun 2026

- Developed and evaluated Logistic Regression, Random Forest, and XGBoost models using maternal-health indicators for **personalized risk scoring**, and integrated the selected model into Luna, a bilingual (EN/ES) maternal-health app for high-risk pregnant and postpartum women in Harris County.

Associate Analyst - Ernst & Young (EY-GDS)

Aug 2022 - Dec 2024

- Increased conversion of top-ranked sales leads by **40%** over the client's rule-based scoring by building a lead-scoring model in Python (pandas, scikit-learn) and validating it with A/B testing.
- Cut recurring report preparation time by **30%** by writing reusable MySQL stored procedures that automated cleaning, joining, and aggregating multi-source client data.
- Delivered a custom analytics dashboard on schedule by leading a **4-member team onsite in Singapore** through Agile sprints, and trained client stakeholders to use it independently. Received **two EY Spot Awards**.

Data Science Intern - AIRobotica

Jun 2020 - Jul 2020

- Built forecasting models in Python on MySQL retail data and ran regression, ANOVA, and data-quality checks to support client reporting.

PROJECTS

PulseBeat - SQL-Driven Music Recommendation & Analytics Platform

- Designed a normalized (3NF) **15-table MySQL database** with 3 views, 3 stored procedures, and 5 triggers, and wrote analytical SQL (joins, subqueries, window functions) powering personalized recommendations and an admin analytics dashboard in Streamlit.

Netflix Content Strategy Analysis - Tableau

- Built a **7-part interactive Tableau story** on **6,236 Netflix titles** using calculated fields, parameters, and filter actions to analyze catalog growth, maturity ratings, and genre mix by country, published on Tableau Public.

Electricity Demand Forecasting - AWS

- Forecast next-hour electricity demand for Spain's national grid on 35,000+ hourly records, reaching **343 MW MAE (1.2% MAPE)** with LightGBM, **67% lower error** than a last-hour baseline, and served forecasts through a Streamlit dashboard deployed on AWS ECS/Fargate.

EDUCATION

M.S., Engineering Data Science - University of Houston, Houston, TX | GPA: 3.89

Expected Dec 2026

B.E., Computer Science and Engineering - Visvesvaraya Technological University, Bengaluru, India | GPA: 3.6

Aug 2018 - Jul 2022

CERTIFICATIONS & HONORS

Microsoft PL-300: Power BI Data Analyst Associate

DAAD RISE Professional Internship Program, Germany: selected as 1 of 58 from 200 applicants worldwide (2025, offer not pursued)

Databricks Fundamentals | **Google Cloud:** Architecting with Compute Engine Specialization | **EY Data Analytics & Data Visualization** Bronze Badges (Credly)

SKILLS

BI & Reporting: Power BI (DAX, Power Query/M, RLS, Power BI Service), Tableau, Excel (Power Query, PivotTables)

Data: SQL (MySQL, Oracle), stored procedures, views, triggers, data modeling, data validation and reconciliation

Programming & Analytics: Python (pandas, NumPy, scikit-learn), A/B testing, regression, forecasting

Tools: Git, Databricks, AWS, GCP, Streamlit
